

MX7 Ultrasound System

Your favorite portable ultrasound laptop just got better — now expanded with new 3D/4D imaging capabilities!

The MX7 Ultrasound System has been thoughtfully designed to help address the obstacles clinicians face in today's challenging healthcare environments. Weighing just 6.6 lbs with a thickness of 1.7 inches, the MX7 stands out for its compact design, making its main unit one of the lightest and thinnest in the industry.

With a customizable touchscreen and revolutionary, software-based beamformer technology, the MX7 System combines cutting-edge image quality with an intuitive user experience to help ensure efficient diagnosis during the most challenging exams. Now enhanced with optional 3D/4D imaging and iLive Technology, the MX7 offers expanded versatility for a wide range of obstetrical applications.

Re-Introducing the MX7 to Your Facility

At Mindray, your mission is our foundation. You strive to provide patients with the best care possible and rely on outstanding medical devices to provide exceptional care with confidence. We were founded on the dream of increasing access to quality healthcare by providing accessible, relevant medical devices that exceed clinicians' expectations and needs. Our ultrasound solutions provide crystal clear ploppable imaging, color sensitivity with little flash artifact, and easy-to-use advanced technology to ensure clinicians have the information needed to provide confident answers and diagnoses.
